EDUCATION

2023 - Present
KASETSART UNIVERSITY SRIRACHA CAMPUS

- Bachelor of Science (Computer Science)
- GPAX : 3.87

2016 - 2022
HIGH SCHOOL WATPAPRADOOL

- Sciences and Mathematics Program
- GPA: 3.81

SKILLS

- Programming : Python, Java, C, C++
- JavaScript, HTML / CSS
- Node.js Vue.js, RESTful API
- SQL Progress SQL
- Microsoft Office Suite
- Computer Vision — Object detection, image classification, and dataset annotation
- Model Development — Training and fine-tuning with YOLOv11, ViT-B/16, and PyTorch

LANGUAGES

- Thai (Native)
- English (Intermediate)

PROFILE SUMMARY

I'm a Computer Science student at Kasetsart University, Sriracha Campus, Interested in full-stack development and computer vision, with hands-on experience building web applications, preparing image datasets, and training and fine-tuning models for image classification and object detection. A quick learner who enjoys solving practical problems and collaborating with others.

EXPERIENCE

PTT Digital Solutions Co., Ltd. — Intern System Analyst
Rayong Gas Separation Plant, Rayong, Thailand
Jun 2026 – Present | Expected completion: 31 Oct 2026

- Developed an Automated Industrial Gas Meter Reading with AI prototype alongside supporting business analysis and project coordination activities.
- Assisted in preparing Terms of Reference (TOR) documents and participated in user requirements meetings.
- Assisted in preparing meeting minutes and summarizing agreements and action items.

PROJECT

Automated Industrial Gas Meter Reading with AI 2026

- Independently developed a Python/FastAPI prototype to extract gas meter readings from field photographs using YOLOv11, OpenCV, and Gemini.
- Annotated 646 images and trained the detection model; built a web interface supporting multiple images, structured JSON output, and review of uncertain readings.

MunBOT — AI-Based Cassava Leaf Disease Analysis and Survey System 2026

- Fine-tuned a ViT-B/16 model using Python and PyTorch for four-class cassava leaf classification within a prototype supporting LINE LIFF disease surveys.
- Developed a LINE chatbot using n8n and Pinecone-based RAG to classify uploaded leaf images and answer disease-management questions from reference manuals.

Kemi Classroom — Chemistry Classroom Web Application 2026

- Developing a web application using React, TypeScript, and Supabase, designed for chemistry assignment submissions, grading, and gamified rewards.
- Implemented Google authentication, role-based access for students, teachers, and administrators, and PostgreSQL row-level security policies.

MonoShop - Full-Stack E-Commerce Website 2025

- Built an e-commerce website using Vue.js, Express.js, and PostgreSQL, with product management, a shopping cart, and REST APIs.

ReBottle Scout - AI Plastic Classification & Community Recycling Map Platform (Super AI Engineer: The 5th) 2025

- Developed an AI chatbot and web platform to classify recyclable plastics from photographs and map community recycling hotspots.
